## Climate Change and Health

### PRESENTATIONS:

**Heidi E. Brown, PhD, MPH**  
Professor and Program  
Director in Epidemiology

#### Supporting Resilient Communities

In this overview, Dr. Brown will highlight activities that are supporting resilient communities in the United States Southwest

**Chris Lim, PhD**  
Assistant Professor of  
Environmental Health  
Sciences

#### Exposure Assessment for Environment and Health

Climate change and changing environmental exposure patterns are impacting human health. We will discuss application of various exposure assessment methods applied to ongoing projects on climate change and health

**Mona Arora, PhD, MSPH**  
Assistant Research Professor  
SCORCH mPI and Community  
Engagement Co-Director  
Community, Environment, and Policy

#### Partnerships & Community Engagement for Co-designing Heat and Health Solutions

How the SCORCH Community Engagement Core is advancing local, evidence-based solutions to the health impacts of extreme heat. It will showcase innovative partnerships, programs and interventions that address heat risk and build community resilience.
