

Heidi E. Brown, Ph.D., M.P.H.

## CONTACT INFORMATION

Division of Epidemiology and Biostatistics  
Mel & Enid Zuckerman College of Public Health  
University of Arizona  
1295 N Martin  
Tucson, AZ 85724-5211  
P.O. Box 245211  
Phone: (520) 626-2262  
Fax: (520) 626-9900  
E-mail: heidibrown@email.arizona.edu

## EDUCATION

- 2007 Ph.D., Division of Epidemiology of Microbial Diseases, Department of Epidemiology, Yale University
- 2006 M.Phil., Division of Epidemiology of Microbial Diseases, Department of Epidemiology, Yale University
- 1999 M.P.H., Division of Global Health, School of Public Health, George Washington University, Major: International Health Promotion
- 1995 B.S., Department of Psychology, Virginia Polytechnic Institute & State University, Major: Psychology, Minor: Biology

## DISSERTATION & THESIS

- 2007 Into the Environment of Mosquito-Borne Disease: Spatial Analysis of Vector Distribution Using Traditional and Remotely Sensed Methods, Doctor of Philosophy Dissertation, Yale University, Durland Fish, Chair
- 1999 Rabies in Fairfax County, VA, USA, Masters of Public Health Thesis, George Washington University, Gilbert Kombe, Chair

## RESEARCH EXPERIENCE

The University of Arizona, Tucson, AZ

---

- 2013 – Assistant Professor  
Develop spatial and temporal statistical models of disease risk on a variety of systems (e.g., mosquitoes and West Nile virus disease, dengue, and canine heartworm; biting midges and bluetongue; fleas and plague; ticks and tularemia). Provide quantitative assessment and predictions of the association between climate change and health.

2010 – 2013 Postdoctoral Research Associate

As part of the Applied Climate for Environment and Society Laboratory, develop weather driven dynamic models of West Nile virus vector abundance. Investigate public health implications of climate change.

Texas Biomedical Research Institute, San Antonio, TX

---

2010 – 2011 Visiting Scientist

Conducted experiments to compare differential midgut binding affinities for multiple dengue serotype-2 strains in two mosquito populations and a study aimed at characterizing dengue disease severity in humanized mouse models under natural infection (mosquito bite versus needle inoculation). Maintain multiple mosquito strain colonies.

Centers for Disease Control and Prevention, Fort Collins, CO

---

2009 – 2010 Senior Service Fellow

2008 – 2009 ORISE Fellow

Determined spatial and temporal predictors of two vector-borne diseases, plague and tularemia, utilizing meteorological and land-cover information in a GIS. Organized and lead field sampling collections (16 collectors, 79 sites). Identified flea and tick specimens to species.

Oxford University, Oxford, UK

---

2007 – 2008 Postdoctoral Research Assistant

As a member of the Spatial Ecology and Epidemiology Research Group, identified the effect of wind in the spread of a blue tongue virus throughout northern Europe.

Yale University, New Haven, CT

---

2004 – 2007 Graduate Student

Graduate studies included field collections of adult and larval mosquitoes in order to develop ecological niche models using remotely sensed imagery. Identified adult and larval specimens to species.

As a member of the Vector Ecology Laboratory, designed and directed mosquito field collections in Dominica (8 collectors). This Caribbean island has sporadic dengue epidemics and at least one vector competent species, *Aedes aegypti*, is well established.

## TEACHING EXPERIENCE

### University of AZ, Mel and Enid Zuckerman College of Public Health, Tucson, AZ

---

2014, S	CPH 676 Spatial Epidemiology	Instructor, 8 students
2014, S	CPH 309 Intro Epidemiology	Instructor, 128 students
2013, S	CPH 309 Intro Epidemiology	Co-Instructor, 127 students
2013, S	CPH 606 Infectious Disease Epidemiology	Co-Instructor, 22 students
2012, F	CPH 376 Intro Health Science Statistics	Instructor, 122 students
2012, S	CPH 376 Intro Health Science Statistics	Instructor, 128 students

### San Antonio College, San Antonio, TX

---

2011	Intro to Geographic Information Systems 4 credit Course (Lecture and Lab)	Adjunct Faculty, 10 students
------	--	------------------------------

### Oxford University, Oxford, UK

---

2007 – 2008	RS/GIS Applications to Habitat Modeling	Tutor, 8 students
2008	Biology of Vector-borne Disease	Teaching Assistant, ~25 students

### Yale University, New Haven, CT

---

2007	Epidemiologic Methods in STD/HIV	Teaching Assistant, 18 students
2006	Observing Earth from Space	Assistant (3 wk), 45 students
2005	Epidemiologic Methods in STD/HIV	Teaching Assistant, 13 students
2005	Psychosocial Epidemiology	Teaching Assistant, 42 students
2004	Immunology for Epidemiologists	Teaching Assistant, 32 students
2004	Public Health Issues in HIV/AIDS	Teaching Assistant, 42 students

## SERVICE

### Professional Memberships

---

American Society of Tropical Medicine and Hygiene  
Society for Vector Ecology  
Entomologic Society of America

### Manuscript Reviewer

---

*Acta Tropica, Environmental Science and Pollution Research, Journal of the American Mosquito Control Association, PLoS Neglected Tropical Diseases, American Journal of Tropical Medicine and Hygiene, EcoHealth, Emerging Infectious Diseases, Remote Sensing of Environment*

### Grant Reviewer

---

2012	Deutsche Forschungsgemeinschaft (German Research Group), Establish a Research Group
2011	National Science Foundation, Catalyzing New International Collaborations

## AWARDS

- 2008 – 2009 Oak Ridge Institute for Science and Education (ORISE) Post-Doctoral Fellowship at the CDC – Fort Collins, CO (Salary and expenses)
- 2006 “Predicting mosquito species distribution using satellite imagery.” Society for Vector Ecology 37th Annual Conference Student Presentation Award, Anchorage, AK (\$200 honorarium and conference registration remission)
- 2004 – 2007 McDougal Fellow for Academic and Student Life- Community Service, Career Services and Coordinating Fellow, Yale University (\$4,000 annual)
- 2003 – 2007 CDC Training Program in Vector-Borne Diseases Fellow, New Haven, CT
- 2002 US Delegate to the NATO Bio Medical Advisory Committee Working Group, Institute for Defense Analyses
- 1998 M.P.H. Merit Scholarship, George Washington University (Tuition remission for one course)

## ADVANCED SOFTWARE SKILLS

Data analysis: Proficient in STATA and MS Excel, Familiar with SPSS and SAS  
Geographical analysis: Proficient in ENVI, ArcGIS

## INVITED TALKS

1. “Climate change and health” Invited Speaker: Wilderness Medical Society Annual Conference. ~ 100 attendees mostly MDs. 11/14/2014
2. “Valley Fever and Weather” Invited Speaker Casa Grande Public Safety Building, 373 E Val Vista Road. Presented at the National Weather Service, 2014 AZ Dust Storm Workshop, 19 March 2014
3. “Habitat and Abundance Modeling of West Nile Virus Vector” Invited Speaker: SIAM (Society for Industrial and Applied Mathematics) Conference on the Life Sciences. Charlotte, NC, USA. Mini-Symposium: MS65 Recent Advances in Ecosystems and Disease Models. 6 August 2014.
4. “Where’s Cocci?: Valley Fever and the Weather.” Presented at the Valley Fever Center for Excellence free public forum “Learn About Valley Fever: Ask the Doctors” at the UA Bio5 Institute, 17 November 2013.
5. “Climate Change Related Health Vulnerabilities in AZ and the Southwest.” At the *Climate Smart Southwest: Ready or Hot* Conference hosted by Physicians for Social Responsibility, AZ at the Tucson Convention Center (300 registrants), 20 September 2013.
6. “Climate and the re-emergence of Eastern Equine Encephalitis in the northeastern US.” Invited speaker for Session 56 “Climate Change and Human Health” at The 5<sup>th</sup> International Conference on Medical Geology, Hilton Crystal City Hotel, Arlington, VA, 25-29 August 2013.
7. “Eastern Equine Encephalitis – Is climate change to blame” Invited speaker at the Pima County SWAT – Strategic Warriors Against Transmission in the Abrams Building of the Pima County Health Department, 18 July 2013.
8. “Vector-borne disease invasions: what did West Nile virus teach us?” The Society for Mathematical Biology Annual Meeting and Conference Invited speaker for session

- MS29. Recent advances on modeling study of vector-borne diseases. 10–13 June 2013.
9. “Chapter 15: Health Effects of Climate Change in the Southwest” Webinar as part of a series discussing key chapters from the *Assessment of Climate Change in the Southwest United States: A Technical Report Prepared for the U.S. National Climate Assessment*. December 5, 2012 Recording available on the CLIMAS website: [www.climas.arizona.edu](http://www.climas.arizona.edu).
  10. “Climate change and health.” “The Power to Prepare Tucson: A summit to ready our communities for a changing climate,” Earth Day event sponsored by the City of Tucson, World Wildlife Fund, and Action Climate Tucson, AZ. March 31, 2012
  11. “Climatic predictors of the intra- and inter-annual distributions of plague cases in New Mexico based on 29 years of animal-based surveillance data.” CDC- Fellow’s Science Day, Fort Collins, CO. May 15, 2009
  12. “Making the most of graduate school.” Panelist, New Haven, CT. March 6, 2007.
  13. “Finding Mosquitoes in CT Wetlands Using Hyperspectral Imagery.” Sandia National Laboratories, Albuquerque, NM. February 1, 2006.
