\$15 million

Graduate Program

Alumni: 1,969

Undergraduate Program

Alumni: 1,584

Iman Hakim, MD, PhD, MPH
Dean

- In 1993, the Arizona Board of Regents approved the establishment of the Arizona Graduate Program in Public Health (MPH).
- In 1997, Mel and Enid Zuckerman committed to donate \$10 million over 10 years – the largest gift in UA history at that time – which helped pave the way to the establishment of the College of Public Health.
- As a result of Dr. James Dalen’s vision (then serving as the vice president for health sciences), the Arizona Board of Regents in January 2000 voted to establish the College of Public Health at the University of Arizona.
- In 2002, Mel and Enid Zuckerman were honored for their financial support to the College and their commitment to the University of Arizona by naming the college the Mel and Enid Zuckerman College of Public Health.
- The Canyon Ranch Center for Prevention and Health Promotion was established as a CDC research center from 2004 to 2010. Today, researchers at the center continue to conduct high quality lifestyle-based prevention research and supports community based wellness efforts aimed at improving health and reducing disease risk with the goal to make Tucson a national leader for health and wellness.
- In January 2006, the college began holding classes in its new home, Roy P. Drachman Hall.
- In 2009, the Global Health Institute (GHI) was established to catalyze global health activity at the University of Arizona through domestic and international collaboration aimed at education, collaborative research, training and public health outreach.
- In August 2010, the college expanded public health academics in Phoenix.
- In 2010, the Arizona Public Health Training Center was established with a \$3.2 million grant from the Health Resources and Services Administration (HRSA) to provide free training and continuing education to the public health workforce in the state. Since then, the Center was renamed the Western Region Public Health Training Center receiving more than \$9 million to expand its trainings to cover HRSA Region 9, which includes Arizona, California, Nevada, Hawaii and the U.S. Affiliated Pacific Islands.
- In 2012, the Environment, Exposure Science and Risk Assessment Center (ESRAC) was established to provide expertise to industry, the community, and researchers in the areas of human exposure science and risk assessment of chemical, biological and physical hazards to workers and communities
- In 2016, the Zuckerman College of Public Health – Phoenix campus partnered with the Mexico Border Health Commission to establish the Primary Prevention Mobile Unit program bringing free health screening services to underserved residents in Maricopa County.

Mission:

The University of Arizona Mel and Enid Zuckerman College of Public Health is dedicated to promoting the health of individuals and communities in the southwest and globally with an emphasis on achieving health equity through excellence in education, research and service.

Vision:

Local Impact. National Influence. Global Reach.

- In 2016, the Zuckerman College of Public Health and Northern Arizona University received a \$5 million five-year grant to establish the Center for Indigenous Environmental Health Research to address pollution and other environmental factors that contribute to health disparities among indigenous communities.
- In 2017, the college expanded the Primary Prevention Mobile Unit program in Phoenix to provide free health screening services to underserved residents in Pima County.
- In 2017, the college established the MPH in “One Health” concentration. The MPH in One Health will train students in the theory and application of utilizing One Health approaches to address complex public health challenges.
- In 2018, the college received a \$2.98 million, five-year grant from the National Institute of Environmental Health Sciences to determine if a community health worker intervention can reduce exposures to hazardous chemicals in the workplace.
- In 2018, the Center for Rural Health received \$2.2 million Substance Abuse and Mental Health Services Administration grant to collaborate with the Arizona Department of Health Services to train first responders to administer naloxone, a drug used to counter the effects of opioid overdose and save lives.
- In 2018, the Mel & Enid Zuckerman College of Public Health and the Lowell Institute for Mineral Resources received a \$1.6 million federal grant to develop more effective training methods using serious computer games to improve safety among U.S. mine workers.
- In 2018, the college received a \$1.25 million five-year grant from the National Cancer Institute to train students from underserved communities with an interest in a career as a cancer prevention and control researcher. The STEP-UP in Cancer Prevention Program is a 12-week, paid research program designed for undergraduate and master’s level students.
- Of the students admitted to our academic programs at the College of Public Health, 35% are from U.S. underrepresented minority groups (48.7% white; 23.9% Hispanics; 7.1% African Americans; 3.9% Native Americans; 10.4% Asian Americans; 3.3% International; 0.7% other). The college is home to 25% of the University of Arizona’s returned Peace Corps Fellows. Graduate program alumni number 1,969 and are employed in 31 countries and 45 U.S. states and Puerto Rico.
- The Zuckerman College of Public Health was the first nationally accredited college of public health in the Southwest. Today, the college remains the only accredited college of public health in the state of Arizona.
- Total research funding for the college averages more than \$15 million annually.
- The college is organized into three departments and one multidisciplinary division in Phoenix.
- The college is home to 4 college centers and 6 research-funded centers: College Centers: Canyon Ranch Center for Prevention and Health Promotion; Center for Rural Health; The Environmental, Exposure Science and Risk Assessment Center; and the Global Health Institute. Research-funded Centers: Arizona Prevention Research Center; Arizona Smokers’ Helpline (ASHLine); Center for American Indian Resilience; Western Mining Safety and Health Training Resource Center; Center for Indigenous Environmental Health Research; and Western Region Public Health Training Center.
